

Emergency appeal, let's save Xiao Meng Faye!

IQ70+ set up a medical fund for her. The little life waiting for your love.

Xiao Meng Faye, only one month in this world, had to undergo surgery because of the *Hydrocephalus (buildup of excess fluid within the brain)*. A catheter is loaded into the ventricle to elicit too much brain effusion from the neck to other parts of the body;

Also, doctors found a small concave hole in the baby's spine and she had to undergo surgery. The baby girl must also urinate with the help of intubation, every four hours.

Besides, her legs were weak, will still need to monitor if this will affect her movement in future.

A girl, who was born only last month, March 4, had suffered so much and even facing death threat, is indeed a human tragedy.

The Malaysian Association for the well-being of children with intellectual disabilities (IQ70+) has adopted the unfortunate child, and provide her with all the necessary help, hoping that she would get through the toughest of times, while also providing her with post operation services, timing examination, treatment and living arrangements.

IQ70+ specially employed two paramedics to care Xiao Meng Faye 24 hours.

We're well prepared for all circumstances just in case, to deal with any emergency that may arise.

"Saving people is important" is the reason why we accept Xiao Meng Faye, as her parents do not have the ability to cope with the huge cost of medical support and care.

IQ70+ decided to set up the "Xiao Meng Faye Medical Fund", and shout of to the community of enthusiastically generous society, to quickly save and help Little Dream Faye.

"Xiao Meng Faye Medical Fund" is used to meet the current emergency needs and is also used to cope with the next scheduled inspection. Check and treatment, long-term care and living expenses.

To care for an unfortunate child, especially a baby who has had a major surgery like Xiao Meng Faye, must have a good expenses planning, for the post-operative care, regular checkups, treatment and living expenses are indispensable.

Routine care alone (excluding sudden lesions), 24-hour care, replacement of urination tubes every 4 hours, milk powder with the estimated cost of RM 6,800per month.

Monthly Expense Budget:

Hours professional care (2 person)-----RM 5,000

Urination Tube * (change 4x a day)----- RM500

Milk powder (Neo Baby 0-9 months old)-----RM 500

Paper diapers (S size)-----RM 300

Miscellaneous-----RM 500

Total RM 6,800 * Note: Baby urination Tube Size: 05 FG, 48cm.

IDEALCARE , INFANT FEEDING TUBE, (PROD CODE 25.1001.01).

This is the urinary catheter, and Xiao Meng Faye relies on it to urinate every four hours.

The monthly budget of IQ70+ is more than RM700,000. Xiao Meng Faye has aggravated our expenses. With a heavy burden of expenses, we need the strong support of the enthusiastic people in the community in order to be able to cope.

Dear all sympathetic individuals, Xiao Meng Faye urgently needs your help to have a hope for living. We sincerely ask everyone to give some care, protection, and helping hand to her. Help a baby who has just arrived in the world to tide over the difficulties. Truly appreciate!

Sincere donors can choose to make donation via check or online. You can send the online donation receipt to our Facebook and we will issue the official receipt.

Nonetheless, we welcome you to visit our association!

Xiao Meng Faye is only 2 months old

Xiao Meng Faye must have a catheter in the brain to rule out hydrocephalus. The catheter extends over the neck.
